OEM/ODM Solutions Ceiling Fan Manufacturing for B2B brands

dynastyhvacinternational.com.hk

OEM / ODM
Ceiling Fan Manufacturer

DYNASTY is a manufacturer specialized in OEM and ODM ceiling fans for brands, importers, and international B2B projects.

We design, develop, and produce ceiling fans that combine design, performance, and industrial reliability, with a clear focus on export and scalability.

Our goal is to be more than a supplier: we act as an industrial partner, adapting each product to the technical, aesthetic, and commercial requirements of every market.

Quality Department

Industrial quality designed to protect your brand

At DYNASTY, we understand that in the B2B business, quality is not a commercial promise, but a system.

Our quality department operates under stable processes and defined controls to ensure consistency, reliability, and repeatability in every production run.

We apply controls at all stages of the process—materials, assembly, and final verification—with the objective of reducing incidents, returns, and risks for our customers.

We do not compete with our customers: we are their factory. For this reason, quality is a shared responsibility and a permanent commitment to the brands we manufacture.
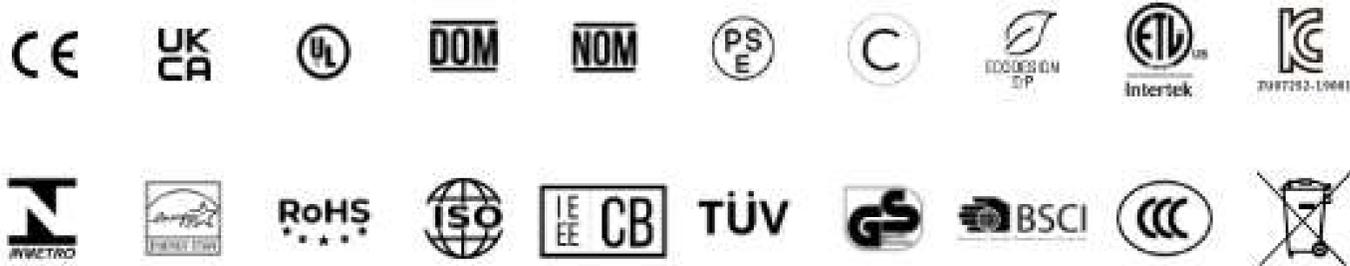

Certifications and Regulatory Compliance

Certifications adapted to each market

Each market has different requirements, and every project demands a specific approach. At DYNASTY, we work with internationally recognized standards such as CE, ETL, GCC, and UKCA, adapting the product to the applicable regulations of the destination country.

Our team supports customers from the initial project phase to ensure that product design, components, and configuration comply with regulatory requirements.

Certifications are not improvised: they are integrated from the design stage to optimize lead times, control costs, and ensure a safe and compliant market launch.

Design and Engineering OEM / ODM

From concept to production

The DYNASTY design and engineering department is the core of our OEM and ODM projects. We work closely with our customers to transform an idea, reference, or market requirement into a technically viable, competitive product ready for mass production.

We develop tailor-made solutions covering product architecture, motors, blades, finishes, LED lighting, control systems, packaging, and technical documentation.

Each project is approached with a practical mindset, focused on target cost, reliability, and industrial scalability.

Confidentiality and long-term Partnerships

We do not compete with our customers; we are their factory.

Confidentiality and loyalty are fundamental pillars at DYNASTY. We strictly protect our customers' designs, molds, pricing, specifications, and commercial strategies.

We meet deadlines, maintain cost stability, and provide fast responses, because we know that a reliable factory is a strategic asset.

We do not seek one-off orders, but long-term partnerships based on transparency, collaboration, and mutual benefit.

Size

Parameter:	C1220:*H290mm
Power (W):	LED 24W/3cct Adjustable color temperature
Airflow(CFM):	167 CFM/W
Weight (kg):	4,8 KG

Lighting

Type of light:	LED
Light output:	2600 lm
Color temperature:	2700-6500K
Adjustable:	Yes

Control & functions

Type of control:	Remote control
Timer:	Yes
Summer/Winter Mode:	Yes
Home automation compatibility:	Opcional: Smart Home Compatibility: Works with Alexa, Google Assistant and app. Voice and mobile control.

Design & finishes

Body colors:	White, Black, Grey, Steel grey, Golden
Colors and materials of the blades:	Colors: Black, Wood light, Wood dark Material: ABS, Solid wood

General specifications

Common to all models and products

Common features for all models and products

Technical features

Installation type:	Downrod Mount / Suspended Mount
Recommended use:	Residential and light commercial use (Living room, Bedroom, Dining room, Office)
Engine type:	Pure copper BLDC motor
Winding type:	Pure Copper Winding
Available speeds:	6
Noise level (dB):	≤35 dB(A)
Energy efficiency:	E
Power consumption:	5-35W

Optional features and warranty

Tube extensions available:	100/200mm
Alternative color or version:	White
Warranty:	3 years

Optional features and warranty

Fan motor and main body:	BLDC motor with pure copper windings and steel housing
Blades:	3
Mounting Kit (Screws, ceiling bracket, accessories):	These components are included in the package
Remote control:	The batteries for the remote control are included as standard at no extra cost.
User manual:	It is included as standard
Product warranty document;	We can issue it at the client's request

Packaging and assembly

Box dimensions:	660*300*210mm
Weight Net/Gross:	4 KG /4,8 KG
Recommended minimum ceiling height:	2,3 m
Included accessories:	Accessory kit + Instruction manual + Label + Adhesive tape + Miscellaneous parts
Certifications:	CE, LVD, EMC, ROHS
